

## Timely intervention

Yubraj Chaudhary from Ratuwamai-1, was born on 20th Kartik 2079 B.S. at Ratuwamai Nagar Hospital. The next day, during a home visit, Mrs. Parvati Sardar, an A.N.M from Kalyanpur health post, discovered Yubraj had bilateral club foot. She quickly informed the Palika Coordinator, and a Community-Based Rehabilitation Facilitator (CBRF), visited the family to counsel them about treatment.

On 1st Mangsir, with support from the Disability Prevention and Rehabilitation Program (DPRP), Yubraj was sent to HRDC Hospital in Itahari, where plastering was done on both feet. After four follow-up visits, he was referred to HRDC in Lahan for a minor operation. Following his recovery, Yubraj received special shoes to aid his treatment.

Yubraj then started wearing his special shoes and started steadily recovering. His mother is deeply thankful to DPRP, CBRFs, and the Palika for their support in ensuring her son received the necessary care.
