

Recovery of Purna Maya Rai

Purna Maya Rai from Bhojpur faced a life-changing illness that left her physically disabled and unable to walk. She was diagnosed with a spinal pathology at Jhapa's B&C Hospital, but the high cost of treatment became a heavy burden for her family.

Through the program (DPRP), Purna Maya received financial support, which led to her treatment and improved her condition. With the help of a Community-Based Rehabilitation Facilitator (CBRF), she started regular physiotherapy sessions. She now walks more comfortably using a walking cane provided by the program, which also enabled her to move, sit, stand, and enjoy outings. Despite her disability, she remains active in social activities, and shows great determination.
