

## Kaviraj's Journey of Hope

Kaviraj Pokhrel was born in Sandakpur Gaunpalika. He began experiencing mental health issues at a young age and over time, his condition worsened. His family, struggling financially had difficulty affording treatment and lack of awareness caused further delays in addressing his health problems.

When the program (DPRP) was introduced in his village, he was issued a disability card and received support for his treatment. The program (DPRP) also provided vocational training which allowed him to start a poultry farming business and improve his family's income. Eventually, Kaviraj also received treatment which improved his condition.

Over time, Kaviraj's daily life got better and he got married and became a father. Although Kaviraj may not fully understand his responsibilities, the improvements in his health and his family's economic and social situation have been remarkable. These positive changes have received praise from the community for the valuable impact of the program (DPRP).
