

Success story of Sahira

Sahira Tamang was born with a cleft lip and palate in Ilam. She faced concerns from her family as they were unaware of treatment options. The program (DPRP) visited her family and informed them about the available treatments. They encouraged Sahira's parents to attend a cleft lip and palate identification camp at Ilam Hospital. At the camp, Sahira was diagnosed and referred to B&B Hospital in Kathmandu for treatment.

She was provided regular counseling and support throughout the process. Sahira underwent successful cleft lip surgery in Kathmandu, which also helped resolve her breastfeeding issues. Her parents are deeply grateful for the support from the program (DPRP).
