

Sarthak's Path to Recovery

Kamal Prasad Khatiwada is a farmer from Ilam who lives with his family. Their joy increased with the birth of their son, Sarthak but they soon noticed that his left foot was slightly different. Initially, they tried traditional remedies but the condition worsened. Seeking proper medical help, Kamal approached Milijuli Group under the program (DPRP). The program helped diagnose Sarthak with clubfoot.

The program (DPRP) coordinated with local authorities and the Hospital and Rehabilitation Center for Disabled Children (HRDC) in Itahari for Sarthak's treatment. Sarthak was referred to HRDC where he began a treatment plan involving serial casts to correct his foot. Kamal expressed deep gratitude for the support from the program (DPRP), saying the advice and assistance had brought hope and relief to their family. Sarthak's progress is being regularly monitored with continued support from the program (DPRP).
